BUDUJ Z WYOBRAŹNIĄ!

Przygotowaliśmy 30 instrukcji o różnym poziomie trudności. Niektóre z nich zawierają bardzo szczegółowe etapy budowy, inne – tylko poszczególne kroki ułatwiające osiągnięcie celu.

Pianka, z której wykonane są klocki jest miękka i elastyczna, co pozwala na bardzo różne zastosowanie. Klocki można dowolnie wyginać i wykręcać, ponieważ ostatecznie „powrócą” do pierwotnego kształtu.

Elementy wypełniające otwory klocków PERFECT™ mogą pełnić kilka istotnych funkcji. Najważniejsza z nich, to możliwość łączenia dwóch klocków. Druga to blokowanie – wkładając element pionowo lub poziomo w otwory klocka, zapobiegiesz „rozsuwaniu” się konstrukcji. Kostki są także ozdobnikami i świetnie usztywniają duże klocki będące podstawą większej budowli.

Większość, spośród zaprezentowanych przez nas budowli to propozycje, które wskazują drogę do realizacji swoich własnych pomysłów! Np. ciuchcia (str.41) powstała z kilku większych elementów. Jeśli wykonasz ich więcej, mogą posłużyć do zbudowania zamku, domku lub zegara Big Ben, jaki widać po lewej stronie tekstu. Z kolei auto ze strony 12 da się przeobrazić na samolot, ciężarówkę lub inny dwuosobowy pojazd kosmiczny.

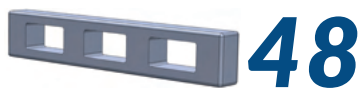

Mamy nadzieję, że nasze propozycje nie tylko posłużą Wam do wiernego odtwarzania kolejnych kroków, ale przede wszystkim pozwolą lepiej poznać klocki i cieszyć się ich możliwościami!

Udanej zabawy!
